

Taahirah Denmark

Full-Stack Engineer · Product · TypeScript · React · Node.js
O'Fallon, IL (Remote-first) · taahirah_d@icloud.com · (757) 816-6599 · github.com/Engineernoob · taahirah-exe.vercel.app

SUMMARY

Full-stack engineer with production experience shipping product features end-to-end in TypeScript, React, and Node.js. Comfortable owning a feature from zero — backend pipeline, API design, frontend integration, and deployment — at a startup pace. Strong eye for product quality and user impact.

EXPERIENCE

Software Engineering Intern · Series

New York, NY (Remote) · Jul 2024 – Jul 2025

- Owned and shipped NLP-driven recommendation features 0-to-1 — drove 30% engagement increase across 1,500+ users by building the backend pipeline and wiring it through to the frontend UI.
- Built and maintained full-stack product features in TypeScript and Node.js, handling 10,000+ daily API requests at sub-200ms latency.
- Collaborated cross-functionally with product and design to scope features, prioritize roadmap items, and ship iteratively.
- Optimized PostgreSQL via indexing and query plan analysis, reducing read latency by 20%.

PROJECTS

PatchPilot — AI Debugging Platform

Next.js · FastAPI · PostgreSQL · Ollama · TypeScript

- Sole engineer across frontend, backend, and AI infra — Next.js UI with streaming inference, FastAPI REST API, RAG pipeline, Postgres history. Built from scratch.

HIRE INTEL — Hiring Intelligence Platform

React · FastAPI · TypeScript · Ollama · PostgreSQL

- Full-stack hiring tool built solo: JD ingestion, LLM fit scoring, cold outreach generation, pipeline tracker — React frontend, FastAPI backend, fully local inference.

VIGIL — Real-Time OSINT Dashboard

TypeScript · React · Three.js · Node.js · REST APIs

- Real-time intelligence dashboard with a 3D globe (Three.js), live feeds from USGS, NASA EONET, GDELT, AlienVault OTX, and NVD/NIST. CORS proxy fallback chains for reliability.

macOS AI Interview Assistant

Go · CGo · Objective-C · Whisper.cpp · Ollama

- VAD-gated transcription + streaming inference + teleprompter overlay, invisible to screen share — built full CGo/Obj-C bridge layer from scratch.

Portfolio — Windows 95 Browser OS

TypeScript · React · Three.js · Vite · Vercel

- Retro desktop OS in the browser: draggable windows, z-index stacking, taskbar, working apps, Three.js landing scene — no UI frameworks.

SKILLS

- Languages** — TypeScript, JavaScript, Python, Go, Rust, Swift, SQL, C++
- Frontend** — React, Next.js, Vite, TailwindCSS, Three.js, WebGL/GLSL, Expo (React Native)
- Backend / Infra** — Node.js, FastAPI, PostgreSQL, SQLite, REST, WebSockets, Docker, GCP, Vercel
- AI / ML** — Ollama, RAG, LLM integration, NLP, embeddings, prompt engineering, Anthropic API

EDUCATION

B.S. Computer Science · Lewis University · 2025–2027 (in progress)
